

Flexseal 300

Polymeric, extrudable, hydro -expansive sealant in cartridge

A hydro-expansive polyurethane sealant in a thixotropic paste, pre-packaged in an extrudable cartridge with standard dosing guns, to be utilised as a waterstop in the most complex or problematic situations in waterproofing below-ground areas. Its elastic and sealing properties remain unchanged over time. In a completely dry state, Flexseal 300 shrinks to its original size and then expands again upon contact with water.

CUSTOMS CODE: 3909 5090

COMPONENTS: Single-component

APPEARANCE: Cartridge

AVAILABLE COLORS: Red

PACKAGING AND DIMENSIONS: Cartridge 300 cc - Box: 12 x (Cartridge 300 cc)

FIELDS OF APPLICATION

Formation of airtight seals at connections, holes, cavities, cracking, formwork blades etc.; execution of seals in the connection between pipes and masonry; Material to assist in laying both traditional and hydro-expansive waterstop profiles.

ALLOWED SUPPORTS

Concrete - Prefabricated concrete - Wood - Plastic - Fiber-cement - Floor screed - Steel

PREPARATION OF SUPPORTS

The application surfaces should be clean, free of incrustations, crumbling and non-adhering parts, dust etc.

MODE OF USE

Cut the tip of the cartridge with a cutter so as to allow the extrusion of a sealant kerb of at least 8 mm in diameter (to ensure that the sealing is both efficient and hydro-expansive). Flexseal 300 must be placed laid in properly confined sections and covered with at least 6 cm of structural, shrink-resistant mortar Grout 6 (castable) or Repar Tix (thixotropic).

APPLICATION METHODS

Dispensing gun - Spatula

TOOL CLEANING

Nitro thinner

KEY FEATURES

-  Density: 1.35 kg/dm³
-  Nonflammable
-  Use wearing protective gloves

-  Hydroexpansive product: +100 %
-  Shelf-life: 9 months
-  UV-resistant

TECHNICAL SPECIFICATIONS

DIN 52451
24 hour expansion capability **+25 %**

DIN 52451
Expansion capacity to 7 days **+100 %**

Alkali-resistant material

Breaking load longitudinal **3.5 MPa**

Shore A
Hardness **45**

Working temperature **-20 / +50 °C**

a 20°C
Touch hardening at 20°C **10 h**

Dust-free time at 20°C **3-5 h**

CONSUMPTION

From 0.15 to 0.30 cartridges of Flexseal 300 for each linear metre to be sealed, depending on the geometry of the cavity.

STORAGE AND CONSERVATION

Store the product in its original packing, in a fresh and dry environment, avoiding frost and direct sunlight. Inadequate storage of the product may result in a loss of rheological performance.

WARNINGS AND PRECAUTIONS

Do not use Flexseal 300 as a simple silicone. Totally unconfined expansion would detach it from the support, thus making the sealing redundant. The general information, along with any instructions and recommendations for use of this product, including in this data sheet and eventually provided verbally or in writing, correspond to the present state of our scientific and practical knowledge. Any technical and performance data reported is the result of laboratory tests conducted in a controlled environment and thus may be subject to modification in relation to the actual conditions of implementation.

Azichem Srl does not assume any liability arising from inadequate characteristics related to improper use of the product or connected to defects arising from factors or elements unrelated to the quality of the product, including improper storage. Those wishing to utilise the product are required to determine prior to use whether or not the same is suitable for the intended use, assuming all consequent responsibility.
