

Protech Flex

Polyurethane sealant in a cartridge with a high modulus of elasticity

A single-component, moisture-curing and fast-hardening polyurethane sealant with a medium-to-high modulus of elasticity, remaining permanently elastic yet with high surface hardness and being tear- and weather-resistance and paintable. Ideal for the deformable sealing of expansion joints on terraces and balconies, for filling joints on prefabricated walls and on wooden, steel, aluminium, copper and plastic materials along with plasters and so on.

CUSTOMS CODE: 3909 5090

COMPONENTS: Single-component

APPEARANCE: Paste

AVAILABLE COLORS: Request available colors

PACKAGING AND DIMENSIONS: Cartridge 600 cc - Cartridge 300 cc - Box: 12 x (Cartridge 300 cc) - Box: 20 x (Cartridge 600 cc)

FEATURES AND BENEFITS

- Free from solvents, PVC, halogenated compounds, odourless. - Permanently elastic, high resistance to raging and to the atmosphere. - Free of shrinkage and dimensionally stable. - High thixotropy: it does not drip and does not create burrs. Easy workability. - It is not sticky and does not accumulate dust and dirt. - Over-paintable after polymerisation has been completed.

FIELDS OF APPLICATION

The high versatility and excellent adhesion to different media make Protech Flex the most suitable adhesive sealant for flooring and roofing joints made of concrete, wood products, steel, stainless steel, aluminium, anodised aluminium, galvanized steel sheets, copper, plastics, etc.

ALLOWED SUPPORTS

Plasters - Concrete - Cement-based or lime-based mortars - Prefabricated concrete - Drywall - Wood - Metal surfaces - Plastic - Fiber-cement - Tiles - Floor screed

PREPARATION OF SUPPORTS

The application supports must be perfectly clean and dry, free from dust and soiling. Preliminarily treating the side walls of the joint with the appropriate primer single-component polyurethane Protech Flex Primer. It is appropriate to provide for inserting into the joint, whatever its nature, the specific foamed polyethylene kerb Filtene Fondogiunto, of the appropriate size to the joint to be sealed. Prepare an easily removable paper ribbon (coachbuilder ribbon type) on both sides of the joint, in order to prevent the sealant overflowing outside of the natural seating of the joint.

MODE OF USE

Slowly and carefully extrude the sealant from the cartridge in the specially prepared seat of the joint, with the appropriate gun (of the type for silicone). Before the total hardening of the sealant, spread it to the brim with spatula on the surface of the joint. After hardening, remove the adhesive tape. Clean any product overflows from the seat of the joint with suitable solvents (like acetone or Nitro thinner).

APPLICATION METHODS

Apply by hand - Dispensing gun

TOOL CLEANING

Nitro thinner

KEY FEATURES

 Density: 1.30 (\pm 0.05) g/cm³

 Shelf-life: 12 months

 Use wearing protective gloves

 Nonflammable

 Temperature of use: +5 / +35 °C

 UV-resistant

TECHNICAL SPECIFICATIONS

DIN 53505 - Shore A
Hardness **40**

DIN 53504
Breaking load longitudinal **1.5 N/mm²**

DIN 53504
Longitudinal elongation at break **\geq 300 %**

DIN 53504
Static elastic modulus **0.6 N/mm²**

10' a 150°C
Dry residue **\geq 95 %**

Working temperature **-40/+80 °C**

a 20°C
Complete hardening at 20°C **24 h**

a 20°C
Touch hardening at 20°C **60 min**

CONSUMPTION

Indicative consumption with a 300 cc Protech Flex cartridge: 5x2,5 mm joint = 20 linear metres; 10x5 mm joint = 6 linear metres; 15x7,5 mm joint = 2,5 linear metres; 20x10 mm joint = 1.5 linear metres

STORAGE AND CONSERVATION

Protect from freezing. Store the product in its original packing, in a fresh and dry environment, avoiding frost and direct sunlight. Inadequate storage of the product may result in a loss of rheological performance. Protect from humidity. Store the product at a temperature between +5°C and +35°C.

WARNINGS AND PRECAUTIONS

Carry out preliminary adhesion and compatibility tests of paints in case of subsequently painting the sealant.

It is good practice for the depth of the sealing section not to exceed half the width of the joint. To this end, the depth will be determined by the placement of Filtene Fondogiunto. The general information, along with any instructions and recommendations for use of this product, including in this data sheet and eventually provided verbally or in writing, correspond to the present state of our scientific and practical knowledge.
